

ALEC EXPOSED

"ALEC" has long been a secretive collaboration between Big Business and "conservative" politicians. Behind closed doors, they ghostwrite "model" bills to be introduced in state capitols across the country. This agenda-underwritten by global corporations--includes major tax loopholes for big industries and the super rich, proposals to offshore U.S. jobs and gut minimum wage, and efforts to weaken public health, safety, and environmental protections. Although many of these bills have become law, until now, their origin has been largely unknown. With **ALEC EXPOSED**, the Center for Media and Democracy hopes more Americans will study the bills to understand the depth and breadth of how big corporations are changing the legal rules and undermining democracy across the nation.

Did you know that Reynolds American-- one of the biggest tobacco companies in the world-- was the corporate co-chair in 2011?

Center for Media and Democracy's quick summary

From the older resolutions in support of Fast Track Trade Promotion Authority-- which was used to push a permanent normal trading relationship with China through Congress in 2000 with little discussion or debate-- to more recent resolutions in support of the proposed Colombia Free Trade Agreement, ALEC has consistently urged its members to support a radical "free trade" agenda. This free trade agenda has cost America millions of jobs as factories closed and moved overseas in search of cheaper labor. Since 2001, an estimated 2.4 million American jobs have been lost to China alone. Now a diverse array of service sector jobs, from accounting and tax preparation to health care and credit card servicing, are being offshored under these agreements. Such free trade agreements also allow public health, consumer, environmental and worker safety rules to be challenged as "barriers to trade" in trade tribunals that operate outside the constraints of U.S. law.

ALEC has also been a major promoter of the U.S. tobacco industry, which seeks to hook new generations of smokers on their products around the world. Reynolds Tobacco is on the International Relations Task Force of ALEC. ALEC has a trade resolution specifically advancing a newer tobacco product called *Snus*, a moist tobacco product often marketed to the young with fruit flavors. Reynolds produces Camel *Snus* in four flavors and is not happy that this dangerous product is banned in most of Europe.
